2ND CLASS LINEWORKER

DISTINGUISHING FEATURES OF THE CLASS: The work involves responsibility for assisting a 1st Class Lineworker in the erection, installation and maintenance of overhead and underground primary and secondary electric power lines and poles by performing a variety of ground operations. This classification is the 2nd and last move toward the eventual classification of 1st Class Lineworker if candidate can accomplish related duties. Must be able to operate and work out of aerial bucket lift plus be able to climb with hooks and belt. Works on secondaries and primaries and all associated work as required. Requires climbing of poles in all kinds of weather conditions and rigid observation of safety precautions to prevent personal injury. Work is performed under general supervision of a Foreworker, Chief Lineworker or 1st Class Lineworker. The incumbent does related work as required.

TYPICAL WORK ACTIVITIES: (Illustrative only)

Digs holes, sets and guys poles for electric power transmission wires;
Strings electric power lines on poles and through underground conduits;
Installs crossarms and erects transformers on power poles;
Repairs damage done to electric transmission lines by storm;
Trims and prunes trees in the path of transmission cables;
Installs and maintains street lighting fixtures;
Runs service lines from transformers on poles to homes and buildings;
Installs cutouts, fuses, electric lights, arresters, insulators and transformers.

MINIMUM QUALIFICATIONS:

Six months experience as Apprentice Groundworker, six months as Groundworker and one year as 3rd Class Lineworker; or an equivalent combination of training and experience sufficient to indicate ability to do the work.
