

COVID-19 Exposure Procedures: Vaccinated and Unvaccinated Individuals

¹ Two weeks after second dose of Pfizer or Moderna and booster (if eligible), or two weeks after single dose of J&J vaccine and booster (if eligible), or recovered from COVID-19 in the previous 3 months.

² No mandatory quarantine for asymptomatic vaccinated individuals; if symptomatic, self-quarantine required while waiting for test results.

³ Close contact: within 6 feet of someone with COVID-19 for a cumulative total of 15 minutes or more over a 24-hour period.

⁴ Recommended standard prevention measures: get vaccinated and boosted; wear a mask in indoor public settings; wash hands; avoid touching face; cover coughs/sneezes; disinfect surfaces; stay 6 feet from others; avoid close contact with sick individuals.

⁵ If working in a healthcare setting, refer to [NYSDOH healthcare specific guidance](#)
