

ADDENDUM NO. 2

Gulf Brook Channel Restoration Project

Town of Keene, New York

October 10, 2014

TO ALL CONTRACT DOCUMENT HOLDERS AND PROSPECTIVE BIDDERS:

This Addendum is issued to document clarifications and modifications to the Contract Documents for the Gulf Brook Channel Restoration Project. This Addendum is made a part of the Contract Documents. Each bidder must acknowledge receipt of the Addendum on the Proposal Form.

1. Answers to additional questions received in writing to date:

- I am in the process of ordering a Bid Bond for the above referenced project and in looking at the Consent of Surety (Bid Security Form #1) our bonding company needs to list a Contract Number. I cannot find a Contract Number in the specifications.?
A contract number has not yet been assigned. This part of the form may be left blank. If the bonding company insists on a contract number use "Gulf Brook Channel Stabilization Project" or use the NRCS Project #5053.
- How do you intend to pay for placement of Type VI and IV rip rap material, by the Ton per truck slips or by pre survey of the subgrade and post in-place survey comparison?
Equipment time and labor for the placement of the Type IV and Type VI Rock shall be included in the Lump Sum price for the Base Bid, regardless of whether the material is re-purposed from on-site or brought in from a quarry. Measurement of brought-in material that is bid unit price shall be by volume in place per cubic yard. In lieu of requiring the contractor to survey pre and post placement, a conversion factor of 1.4 tons per cubic yard (bulk density of broken granite) may be used to determine the volume in place from the weight of the material as determined from truck slips provided by the quarry.
- How will we get paid for salvaged boulder material that is placed within the slopes? The addendum says to anticipate the reduction of the bid form quantities for rip rap type IV and VI due to the use of an unknown quantity of salvaged boulder materials, so essentially we won't get paid for placement of these salvaged boulders?
Equipment time and labor for the placement of salvaged rock and rock brought in from a quarry shall be included in the lump sum price.
- Would you consider placement of salvaged material per time and material?
No. This should be included in the lump sum price.
- I noticed that on your bid form both of your unit prices for rip rap material say Type IV. Which quantity is supposed to be IV and which is supposed to be VI?

This is a typographical error. The second item in the list in the quantity of 3,140 cubic yards should be Type VI Rock. An updated proposal form has been attached to this addendum.
